

How do I get my License ?

1

So how does this **LICENSING** thing work then ?

2

First **DOWNLOAD** the trial version of the software

3

Then **INSTALL** on your SharePoint Server

4

The software generates an **INSTALLATION CODE** which tells us which server you have it installed on

5

Send us the **INSTALLATION CODE**

6

And we will send you a **LICENSE KEY**

7

Which you use to unlock **UNLOCK** the trial software on your server giving you fully functional software

How to Get Your License Key

Download a trial version of the software:

<http://www.pentalogic.net/home/free-trial-downloads>

Install it on to the server where you wish to run your licensed software.

Access the installation code for that server:

Reminder:

<http://www.pentalogic.net/sharepoint-products/reminder/reminder-manual?p=configurationtool/licensing.htm>

Planner:

http://www.pentalogic.net/sharepoint-products/planner/planner-manual?p=faq%2Ffaq_licensing.htm

PivotPoint

<http://www.pentalogic.net/sharepoint-products/pivotpoint/pivotpoint-manual?p=configuration%2Flicensing-and-support.htm>

Email the installation code to: support@pentalogic.net

We will then return your license key, which you should enter into the web part, next to where you found the installation code.

In the case of Reminder, you may need to wait up to 3 hours for the “trial” message to disappear from the webpart.

In case of any difficulty please contact: support@pentalogic.net.
